

Develop Emergency Response Plans at the Speed of Work

The Challenge

Your organization needs an emergency response and operational continuity plan that can be quickly developed, customized, maintained and deployed. Or your organization has such plans but they are not properly deployed or maintained, so users waste precious time searching for critical information - under normal and crisis situations.

The Solution

EPSScentral LLC helps you leverage your existing plans or incorporate our validated content developed by industry leaders. We help you to methodically customize your plan, meeting unique requirements specific to your organization. You can then instantly deploy and maintain the plan on your internal or external web sites so your employees have access to current information 365/24/7.

Results

- Capture and deploy emergency response planning processes and knowledge in weeks, not months.
- Maintain operational continuity during a crisis.
- Protect the livelihood and health of your workforce and customers.
- Reduce training time and cost by 80%.
- Reduce the cost of your plan rollout and maintenance by as much as 90%.

What good is an operational continuity plan if critical information isn't accessible precisely when it's needed?

Organizations have varying levels of emergency preparedness and response plans. Some have detailed emergency response and procedures located in paper binders or electronic files. In some cases, key individuals have this information in their heads. Others are starting from ground-zero and need to define and develop their procedures.

Regardless of where the content lies, it ultimately has no value if the people that need it cannot access the information quickly and efficiently. A plan is not operational if it's out-of-date, inaccessible, or not procedural in design.

EPSScentral makes emergency response plans accessible, usable, and easy to maintain. We rapidly assemble information into tailored emergency response plans that can be instantly deployed and maintained via an interactive website.

We can help you capture organization specific knowledge in days using our proven method. We embed situation-specific content in the business processes where it is readily accessible during a crisis. We help to lower the stress and anxiety commonly associated with emergency events by providing the right information to the right people at the right time.

We instantly generate a knowledge base of best practices using intelligent software that deploys an easy-to-maintain plan immediately and in a simple accessible format on your company website.

Rapid Response

EPSScentral will deliver best-practice content, and facilitate customization and deployment at the speed of work—which means that your customized emergency response plan will be up, running, accessible and usable in short order. We will connect your organization with actionable information—real time—so that that your business continues to function through the crisis.

Our Solutions Speak for Themselves
